PROJECTS

Bank Application|

Technology Used : Java , SQL , JSP, Spring MVC etc.

Developed a comprehensive banking application using Java, SQL, JSP, and Spring MVC. The application supports essential banking operations such as depositing funds, viewing account balances, mobile recharges, and secure fund transfers. Implemented a user-friendly interface and ensured robust backend processing for seamless transaction management, focusing on performance, reliability, and scalability

Classification of WBC Using ML Image Processing |

Developed a system for classifying white blood cells using this techniques. Machine learning (ML) models can analyze large datasets and identify subtle patterns that might be missed by human observers. This leads to more accurate classification of white blood cells (WBCs), which is crucial for diagnosing various diseases such as leukemia, infections, and immune disorders.
