PROJECTS

Ecommerce Website Using MEAN Stack

I developed a full-stack eCommerce website using the MEAN stack. The frontend was built using Angular, providing a responsive and dynamic user interface. For the backend, I utilized Node.js and Express to handle server-side logic and API integration. MongoDB served as the database, ensuring efficient data storage and retrieval. The website features include product catalog management, user authentication, shopping cart functionality, and ensuring a seamless shopping experience for customers.

Bank Application

Technology Used : Java , SQL , JSP, Spring MVC etc.
Developed a comprehensive banking application using Java, SQL, JSP, and Spring MVC. The application supports essential banking operations such as depositing funds, viewing account balances, mobile recharges, and secure fund transfers. Implemented a user-friendly interface and ensured robust backend processing for seamless transaction management, focusing on performance, reliability, and scalability
